# **Plastic Straw**

Irene Hsu 405110674

### I. Introduction of Group Project

A. Motivation and Background Information

Purpose 1: Introduce people how serious the problem of plastic straw it is,

and try to raise public awareness.

Purpose 2: Introduce alternatives and better solutions that people can do for

the earth in their daily lives.

B. Short Introduction

Our group decided to do some research on plastic product, and then we

narrowed down our topic into plastic straws because plastic straws cause

environmental problem seriously. We hope we can raise public awareness

and make people change their habits on using plastic straws. In this website,

we offer some statistics and facts about plastic straws to make audiences

understand more about the issues, and we also provide some alternatives and

VERTIN

better solutions that people can apply in their daily lives.

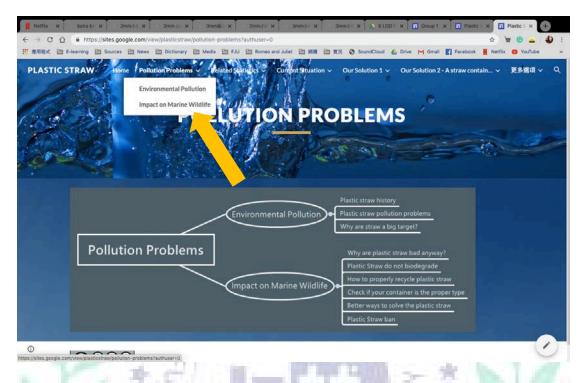

няниса

#### II. Project Content Explanations: Content, Text level

The whole project is focus on plastic straw, and we hope that we can convey the messages that every individual should start protecting the environment from their daily lives by cut down the usage of plastic straws or even stop using them. We used several software to help us building the website such as Google Site, Powtoon, Xmind, and Audasity. **Minor Focus:** A. CO E TR SoundCloud URRY C E-lean En So PLASTIC STRAW Home 更多鑽項、 **Plastic Straw Related Statistics** Current Situation Our Solution 1 Our Solution 2 Pollution Problems Editors ntal Pollutio Usage Taiwan Concept ole Huang Waste EU cts on Marine Wildlife hal Texture Nina Tong Limitations Andrea Luo Allen Li

This is the home page of our website (mind map of our website). We used Xmind

to show a clear map for people to understand the structure of our website easily.

The first part of our website is "Pollution Problems," and we show the facts and

11 . . current concerns here. We used Xmind to arrange the important information for

https://sites.google.com/view/plasticstraw/editors/irene-hsu

I used Audacity to edit music to put in Powtoon as my background music. I add some fade out and fade in in the music.

## C. Self-Evaluation of the Group Project

My role in our group is more like reminding my group members to do their task, and sometimes teach them how to complete their tasks. In our final group project, I am in charge of the Current Situation part. The difficulties are there are lots of messy information on the Internet, and therefore I have to organized first, then put in my website. The limitation of what I can do is that I don't have much time to make this project perfect since everything stick together at the end. All I can do is to try my best to finish the project.

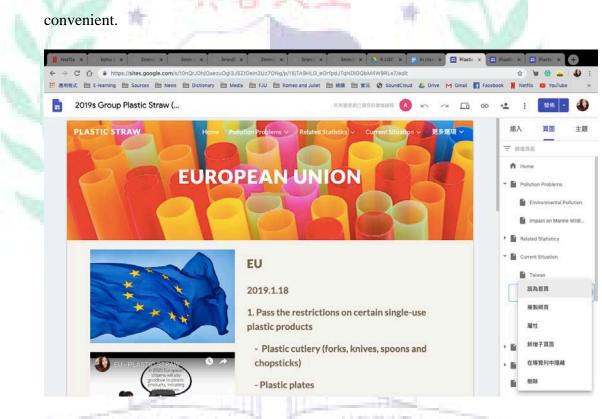

## III. Apps and Software Adopted in the Group Project (include screenshots)

Google Site

A user friendly platform for people to create a website. People can easily build

a well-structured, neat, and clear website for others to visit. I choosed to use

Google site is because it is easily to learn how to use, and it is really

The most important and convenient function is that the website can easily

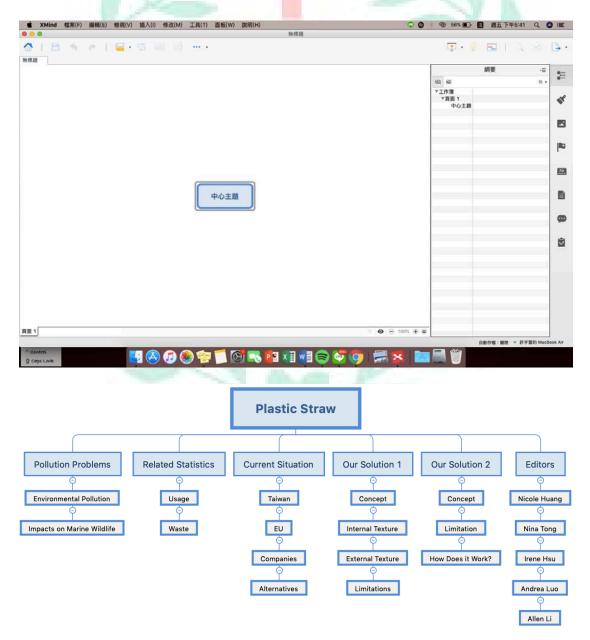

combine with our own google drive. The difficulty of using this software is that people should organize the structure by themselves first. If people have no idea about the structure, the software can't automatically make the structure for people.

Xmind

A mind map making software. It can help people create mind map or any kinds of diagram to make the information clearer to others. Moreover, the function is easily for people to learn and use. Therefore, I decided to use this app to arrange

the information of plastic straw, and put it in our website.

The difficulty of this software is also that pepole should have the idead of the

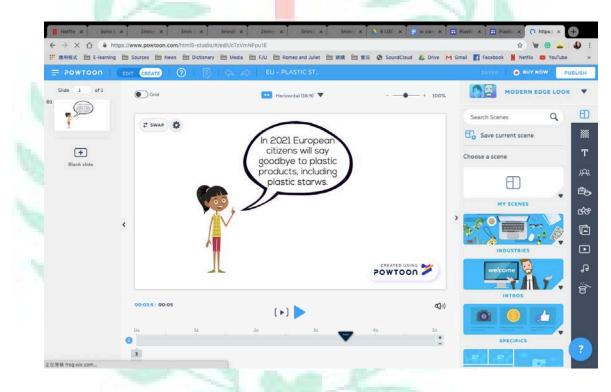

structure first, and use this software to help make the idea clearer.

#### Powtoon

Powtoon allows people to make animaition, and it can add to their website to

make it more interesting and funny to the visitors. I used this software is bacuase

I wan to make my website more intersting to the visitors.

The difficulty of this software is that people must have some creativity so that

they can make cute and funny animations. However, there are some original characters that people may use for their animations, and they are also very cute and useful.

#### Audacity

It is a software that can easily edit music. I use this software because it is simple and useful.

A REALITY OF													

The difficulty of this software is that people should know how the music should

be edited and use the function of the software to make it happen. Sometimes

people might want some special effect but don't know how to make it. Luckily,

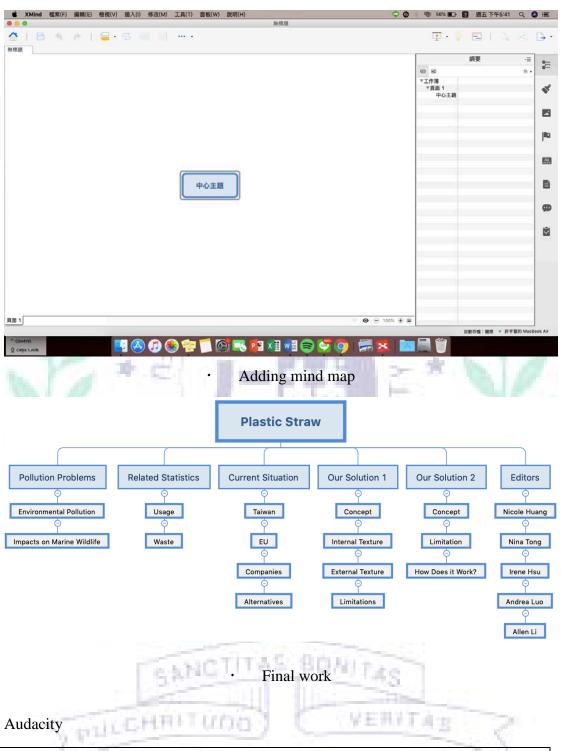

all I want is to make the music fade in and fade out.

#### IV. When I First learned the Apps/Software/Platform

Xmind

I learn to use Xmind on my own, and I think that it is very useful. Moreover, I think it is very user friendly, I didn't have much problem making a mind map with it. The only problem is that when creating a mind map, the tool won't cause many problem, the major problem is that we are not familiar with them aterial, and therefore cannot create a good mind map.

ANDTITAS BONITAS

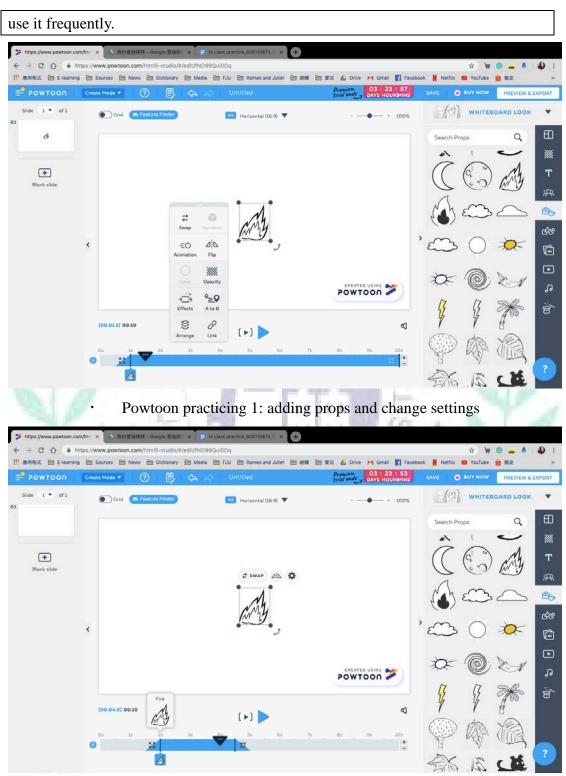

In fact, I love Wix more than Google SIte because Wix can customize our own website. I try to build a site about my favorite band: ONE OK ROCK, and I really like the design inf Wix. There are a lot of nice recommendations that I can use in Wix, and there are also a lot of functions but easily to follow. We also learn how to use Audacity. I think this software is good to use because it is easy to learn and can quickly edit the music. The most common function is to make the music fade in or fade out, and Audacity can easily make this change. I think it is very useful.

Audacity practicing 3: changing language

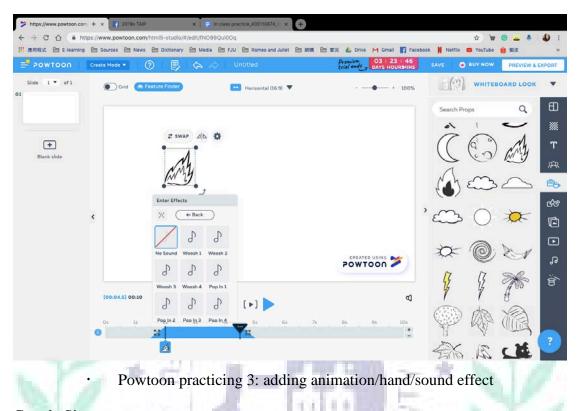

Powtoon

Today we learn how to use Powtoon. I think this website is really convenient and cool because it can easily make an animation. In addition, we also learn how to use Cospaces to create a VR environment. I think this website is more complicated than Powtoon and also quite different. I like this website too, but I don't think that I will

Powtoon practicing 2: adjusting the timeline

## **Google Site**

PLICERE

Today we give a tutorial on Google Site for the class, and I think this is really new to me. We forget to think about the order of the tutorial so the tutorial is a little bit messy. However, I think we still manage to finish the half part of the tutorial, and I think it is clear and easy to follow.

1.1

¥ 8.

÷

43

Today we give the rest part of the tutorial. I teach my classmate how to connects the site with their google drive, and how to share the site with group members. In addition to the tutorial, our group consult BC about the final project. We discuss about the frame and the idea about the website. BC says that the overall the ideas are too general. They are okay but we have to come up with our own thoughts and solutions to plastic straws.

V. Conclusion: Reflections and Thoughts for Creating This Project

I think this class is very useful and informative. I very like this course since I have really learned some good software that I can use in my future such as at school or at workplace. For example, I learn to use Xmind on my own, and I think that it is very useful and user friendly, I didn't have much problem making a mind map with it. I also learn to use Cacoo to create mind map. We organize some courses that are related to a person's ability. I like Cacoo more than Xmind because it is more colorful and user-friendly. When I use this software, I didn't have many difficulties, and I really enjoy using this software.

111

. .

Although there are some difficulties, for example, time limitation, too much work load etc., I still enjoy this class, and I try very hard to complete all the assignments. When we are making the final group project, I really learn lots of information of plastic straw, and when I found some horrible fact about the

environmental problems that are caused due to plastic straws, I was shocked.

This makes me want to give up on using plastic straws and try to protect our

earth. If I didn't choose this course and didn't choose the topic for my final

project, I wouldn't know the seriousness of plastic straws. All in all, I do learn a

lot from this course, and I really like it.
